UAB „Vli Timber“ implements a project partly funded by the European Union

In order to reduce company's electricity usage, UAB „Vli Timber“ implements a project, partly funded by the European Union, called “Increasing the effectiveness of energy usage in “Vli Timber”. During the implementation of this project, an audit for energy usage in the company was conducted in order to identify energy loss causes and potential tools for increasing energy usage effectiveness. Such audit was based on methodology, gathered from audits on energy, energy resources and water usage.

This project is partly funded by European Regional Development Fund based on 2014-2020 European Union Funds program's priority No. 4 „Increasing energy effectiveness and production and sage of renewable energy“ Nr. 04.2.1-LVPA-K-804 „Audit for manufacturing LT“.

A total value of the project is 4 000 EUR, from which 2 800 EUR is funded by the European Regional Development Fund and 1 200 EUR is company's own contribution. Project activities were first implemented on 7th of July 2017 completed on 15th of December 2017.
